Chief,

I don't know if you have ever visited this web site, but I think it is someone we want to keep an eye on. Do you know who John Adams is? Seems like an anti-government radical to me. I'm going to dig a little more to try and get more intelligence on this goof.

Tina,

Thanks for the heads-up, but I have been well aware of the website for sometime now. Although I have a few suspects, I do not know who "John Adams" is (yet). I agree with your assessment of the guy. He has been taking plenty of "shots" at me, our Department, and City Government in general (including DPW and the Fire Department).

It is certainly someone who actually writes pretty well, but who is obviously very arrogant, very liberal, and very condescending in what he writes. Please check with Ryan as I passed on to him some information that might be helpful in identifying who this might be. Thanks!

JC
